## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are required to be rewritten in accordance with U. S. practice. A method claim is basically a sequence of actively performed steps and an apparatus claim is basically a combination of structurally interconnected elements. Throughout the claims "squaring multiplier" is mis-descriptive of a device that multiplies the input by  $2^i$  by shifting the input by  $i$ . Claims 5, 9 and 10 recite "A digital filter as claimed in claim 1" but claim 1 is a method claim.

### ***Specification***

2. Lines 1-2 of page 2 of the specification improperly refer to claims.

### ***Drawings***

3. It appears that Figs. 1 and 7 should be labeled "Prior Art".

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
